THE MAY FESTIVAL .- As large an audience, probably, as was ever crowded into the Methodist church, was that which attended the May Festival, Tuesday evening. The seats and aisles were crowded and many were unable to find seats, so far beyond the expectations of the managers of the Festival and the capacity of the house were the numbers that applied for admission. The musical and literary part of the entertainment gave complete satisfaction to every person in the audience, so diversified were its features and so excellent the presentation of each. An especially pleasing feature of the entertainment was the imitations of the songs of birds, by Miss Grace Scrafford, of the University. This young lady is indeed the possessor of gifts in the line of imitating the whistling and warbling and chattering of birds, wonderin the M. # CHICAGO, ROCK ISLAND & PACIFIC R'Y

By reason of its central position, close relation to principal lines East of Chicago and continuous lines at terminal points West, Northwest and Southwest—is the only true middle-link in that transcontinental system which invites and facilitates travel and traffic in either direction between the Atlantic and Pacific.

The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Gonesso, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns and villages.

## THE CREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roached is thoroughly ballacted. Its track is of heavy steel. Its bridges are solid atructures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and methodical—its discipline strict and exacting. The luxury of its passenger accommodations is unequaled in the West-unsurpassed in the world.

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and—between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

Somewhere the thing we long for Exists on earth's wide bound, Somewhere the sun is shining When winter nips the ground Somewhere the flowers are springing, Somewhere the corn is brown, And ready unto the harvest To feed the hungry town.

Somewhere the twilight gathers And weary men lay by The burden of the daytime, And wrapped in slumber lie; Somewhere the day is breaking, And gloom and darkness flee; Though storms our bark is tossing,

There's somewhere a placid sea And thus, I thought, 'tis always, In this mysterious life, There's always gladness somewhere In spite of its pain and strife; And somewhere the sin and sorrow Of earth are known no more, Somewhere our weary spirits Shall find a peaceful shore.

Somewhere the things that try us Shall all have passed away, And doubt and fear no longer Impede the perfect day. O brother, though the darkness Around thy soul be cast, The earth is rolling sunward And light shall come at last.

The laws of Arkansas provide that at every biennial state election the legal voters of every county shall vote upon the question of license, and that where a majority of the votes in any county shall be for license, the county court may grant license in such wards, cities or towns, in such county, as shall have given majorities for license, in and no others. Under this law, prohibition prevails in 48 of the 75 counties in the state, in many of the towns in the other counties, and even in one ward of the city of Little Rock.

Then, Arkansas has another option law, known as the three-mile limit. Whenever'a majority of the adult inhabitants, men and women together, within a three-mile radius of any school house, academy, college, or other institution of learning, or of any church building, shall petition the county court against the granting of license within such limits, then such license is unlawful. In addition to these, there is still another option, lodged with the county court; for that court, by the decision of the Supreme Court, has absolute and arbitrary discretion, and may refuse all license even where the vote has been favorable thereto; and that discretion is exercised in some counties. Under these three, prohibition prevails in fully three fourths of the territory of Arkansas.

Where license prevails, the statute fixes a uniform tax of \$300 to the state and \$400 to the county, for a full year or any part of a year, beside one per cent. collector's fees and \$2 clerk's fees, and such additional sum for the county as the county court may determine, not less than \$50 nor more than \$200; and in addition to this the town or municipality imposes such local tax as it sees fit, which is usually from \$300 to \$500, and in some cases as high as \$1500. The penalty for selling without a license is double the amount of tax that could have been imposed if there had been license; the licensed seller must give bond to the state in \$2000, for the payment of all damages resulting from his sale, and the repayment of all sums lost by gaming on his premises, for which action may be had against the bond; and no debt for liquor sold is recoverable at law.

In addition to all this, there are spe cial prohibitive and regulative acts in force, applying to special localities with which the general statute express ly declares non-interference, and pro vides that the penalties of such specia acts shall be cumulative to the penal ties of the general act.

The professed object of all liquor laws being the limitation and repression of the business, we declare the Arkansas law the best, short of absolute state prohibition, that has any where appeared; and we commend it to the Legislature of this state, now wrestling with the subject with dubious prospect of success, and to the temper ance people of Michigan, and especially to the Detroit Daily Tribune.

By every indication, the Michigan Legislature is going to fail entirely to satisfy the wishes of the people by agreement upon a liquor law that they will consider of any value, or by agree ment upon such a law touching railroad traffic as the people think should be passed. Upon the former question, if the republican majority in the Legislature shall fail to perceive what public sentiment demands, they will discover when it is too late that as representatives trying to serve the interests of a party they have made a fatal mistake. No party can maintain its supremacy publican.

FOR a paper which has the reputation of being one of the most staunch and uncompromising temperance journals in the state, the editor of which has been conspicuous in church and in moral reform and is looked up to as a prominent public teacher, the Coldwater Republican last week treated its readers to a genuine surprise. It had a glowing and circumstantial account of the opening of a new saloon in Coldwater, embellished by the fervid descriptive powers of a good local editor, and presented the "place" as one of the mothers, the home and family interest most gorgeous and attractive in the state, and one to which the youth of Coldwater might well covet admission. THE GOVERNMENT OF CITIES. The May Century editorially and by correspondence discusses the question of the government of great cities, and the failure of the present method. As a remedy, John D. Cutler, New York merchant, in an open letter, proposes a government by guilds. He would have 'males of lawful age grouped into a hundred guilds, more or less," and each of these "from their own number should choose two or three members of the city council. These should choose the mayor, with full power to appoint and remove heads of departments." The editor of the Century, commenting on this plan, quotes the German philosopher, Hermann Lotze, who says: 'Such combinations, representing partly the most important callings (agriculture, manufactures, commerce, art and science), partly the special local interests of different districts, would form the true unities, the representatives of which by equilibration of the interests of each, would cover the wants of the whole."

But this plan leaves out wholly the largest and the most important interest of all, viz.: that of the house

Naturally, the home-makers are on the side of good government, because only under good government is their chief interest, the home, safe. The temptations which beset other classes are absent from this. The children are its chief treasure. It is for their safety and all the time. To omit this class ment of cities is to leave out the only one that can always be depended on to stand especially for those things on

FLOWERS AT THE WHITE HOUSE.

A Walk Through the Conservatories-Rare and Valuable Plants-Bouquets.

I took a walk one day through the conservatories of the White House and looked at the \$100,000 worth of plants and flowers which are kept there for the furnishing of the president's house and for the decoration of the rooms during his state receptions. These flowers were a very impor-tant item during the administration of president Arthur. Each one of his state dinners contained floral decorations which, if bought of an outside florist, would have cost him, the gardener says, from \$1,500 to \$2,000. The flowers which he used daily were worth about \$50, and on every reception day he filled the parlors | to take. with choice plants.

The eight great conservatories of the White House are now full of beautiful plants, and the floral decoration of the coming season can be supplied as lavishly as the president desires. The estimates of the plants on hand as worth \$100,000 is one given me by the White House gar-dener, and he tells me they would bring \$50,000 at auction. One plant, known as the "anthurium ventricosem," he estimates as worth \$1,000. It looks like a gigantic Indian turnip; its leaves are two feet long, its white flowers two inches wide, and the shape of a calla lilly, and its fragrance is that of a magnolia. It is the only one of roses and nearly every variety of rare and Illinois.

Miss Cleveland frequently walks in the conservatory of the White House. She is very fond of flowers, and her favorite is moss geranium. Said he: "Mrs. Gar-field thought the orchid the prettiest flower that grows. She did not spend as much time in the conservatory as Mrs. Hayes, but she liked flowers very much and strolled through it every morning. President Arthur was very fond of roses, and he always wore a boutonniere made of several choice buds. So far President Cleveland has not worn a buttonhole bouquet, and he had no flowers in his chamber. Neither President Hayes nor Garfield paid much attention to flowers, and no flowers were allowed in Garfield's room while he was sick. When President Cleveland has visitors, vases of fresh flowers are put in each chamber every morning. Miss Cleveland's room is never without a beautiful bunch of roses, and the choicest flowers are never absent from the dinner table of the White House. A new basket is prepared for the table every morning, and the quietest meal sees a bouttonniere lying at the plate of each gentleman and a bouquet de corsage at that of each lady."-Washington Cor. The Sailors and the Hen.

Sailors are usually credited with a good deal of superstition. The following story from the Eastport Standard is a case in point. The steamer New Brunswick of the International line recently had a succession of hard voyages. Head winds and storms were encountered on the trips between St. John and Boston. She was due in Eastport on Friday, but did not reach that port until Sunday noon. The sailors and some of the officers at last concluded that there was a Jonah on board and be gan to look for the cause of the steamer's

It seems that some time ago the steamer's freight included a coop of hens. During the passage, one of the hens got out and as the owner could not get her back into the coop without danger of letting others escape, he gave the hen to one of the deck hands. who kept her in a box on the main deck, There is a superstition among the sailors that if a hen is carried under a tub, bead down, the vessel will encounter head winds as long as the hen is aboard. Concluding that a hen in a box was just as ill an omen as a hen in a tub, the crew began to mutter and the deck hand was compelled to put his hen ashore. Since that the steamer has had favorable weather and the crew are happy.-Boston

Longevity of Opera Singers.

Somebody has been airing his views case of Titiens, "who was over 50 when she died." Leaving out of the question whether one can consider "over 50" old for even a prima donna, I may remark that that great lyric light of the operatic stage only lived to see her 42d year. Medical men assert that cigarette smoking does the donnal interior and the second of the second o more harm to the voice than even the consumption in moderation of the bottled stout with which some artists are credited, or the moderate use of wine in oth ers. All the same, some of our greatest singers smoke incessantly, Campanini, during his engagement at the New York Academy of Music, indulged in cigarettes between the acts, and laughed at the idea that they would injure him or his voice as one of the medical fallacies of the day .-

Free Trade. The reduction of internal revenue and the taking off of revenue stamps from Proprietary Medicines, no doubt has largely benefitted the consumers, as well as relieving the burden of home manufacturers. Especially is this the case with Green's August Flower and Boschee's German Syrup, as the reduction of thirty six cents per dozen has tion of thirty-six cents per dozen, has been added to increase the size of the bottles containing these remedies, thereby giving one-fifth more medicine in the 75 cents size. A Miraculous Escape from the Grave. I have been in poor health, with a diseased stomach and liver, causing a cankered mouth continually for ten years. I kept about my house until a year ago last June. For three years year ago last June. For three years prior to that time I had a severe pain in the region of my heart, at times seeming past endurance. It affected my shoulder, took all strength from my arm; could get no relief only by poulticing. My stomach being so diseased, apropos of the longevity of opera singers my food caused me great distress. My who do not use stimulants, and cites the age also seemed to be in the way of my recovery and not the least of my sickness. I employed the very best of medical assistance I could get while in brandy and ice with only a teaspoonful of nourishment at a time. I com-menced bloating soon after arriving here, and had every appearance of dropsy. We called our Caro physician here, and he said my condition was worse than when in Caro. On the 27th of May last, we called a council of doctors from Vassar, three in number. All of them pronounced my case incurable. I had with the rest inflammation of the bowels, and I lay almost lifeless and one of the leading physicians said that if I could be restored to a sane mind

me, and in three weeks' time they began to put me in an easy chair, for a short time each day, at which time I had no use of my lower limbs and my back was numb; it was a little more than two months before I could walk without crutches. I am now a well woman, have walked one and a half miles within a month can eat all kinds. miles within a month, can eat all kinds of food and enjoy it, have gained from 82 pounds, since last May, to 116 now. Could say more of my sickness, but delicacy prevents. I want to say to my friends that Hibbard's Reumatic Syrup and Plasters are the medicines that cured me. I used four plasters with the first five bottles; have used ten bottles in all and am well. If anyone who reads this has any doubt as to the authenticity of my statement, it will afford me pleasure to refer them to my neighbors all about here, as they are all astonished at my recovery. It is great family remedy. Very Truly, MRS. CHESTER GAGE.

"Put on an extra plate; that man will take dinner with us."

Dinner was soon ready and as soon dispatched, for ceremony was one of the unknown things in the Giles family. Mr. Giles and the stranger retired to the sitting room to discuss the merits of a new reaper and mower, while Mrs. Giles remained and cleared away the dinner table. When she had finished and made herself ready for the afternoon, she went into the sitting room. Mr. Giles was saying: "If you have anything new, and better, anything that will make work easier and do more of it, I'm your man! I'm in favor of all machinery that will lighten work for man. Why, bless you, just look around my farm; it's wun mostly by machinery."

"Profitable? Certainly," replied he, to an interrogation from the stranger. "Money in the bank," he added, never omitting an occasion of mentioning a small deposit he had in the city bank. The stranger was gone at last, and

The two men from business and was gathering together his assets so that he might retire for good to the other side of the water, the two old Scotchmen had an accounting. Until that time everything that the two owned had been undivided. When Mitchell was in Chicago he occupied Smith's room and shared the old bachelor's bed. For ten years there was a little room above the Milwaukee bank that Mitchell occupied, and that George Smith, whenever he was there shared. It had been furnished by the two jointly, even down to the sheets and blankets. For years it had not been occupied, Mitchell having, on marrying his pretty wife, changed his mode of living. In making out the final inventory, Mitchell had, as he supposed, included everything. It aggregated millions. As he handed it to old George Smith he feelingly remarked that it exhibited vastly more than they had had when they started. The millionaire bachelon looked over the list carefully. It held a quarter of the securities of the largest railroad in the world, the St. Paul. When he finished reading it the old fellow turned to Mitchell and said: 'You forgot, Aleck, the bed clothing in the chamber over the bank." The younger of the two Scotchmen prompty took back the inventory and added \$3.75. Smith thought that would be a fair value for the forgotten sheets and blankets and was satisfied. A good authority says that at that moment the thoughtful old bachelor owned \$24,000,000 of the securities of two railroads, the Chicago, Burlington & Quincy and the Chicago, Milwaukee & St. Paul.—Chicago Mail.

are about a dozen cocoanut trees, and about five miles distant is the ocean. Ka Pule, a native guide, and myself reached the trees about noon. Our horses, as well as ourselves, were about used up traveling through the deep sand and under a blazing sun. As we lay stretched at the roots of the towering cocoanuts the trade wind set in cool and refreshing from the ocean. Notwithstanding the heat and weary think of the beautiful stories I had read in my childhood. I began to feel the soft touch of slumber, and all at once I heard a faint, musical tinkling as if troops of fairies were coming to greet us as they used to do the enchanted princes in the olden days. I tried to locate the melodious sounds. In all directions there was nothing but hot, glowing sand. I looked upthere was nothing but the beautiful tropical sky and the tremulous atmosphere. Still loader sounded the music; It was all around us; it filled the air. I gazed toward the ocean, and there, apparently a short distance away, was a beautiful lake, with its waves dashing upon moss covered stones. It was not there when we first arrived at the place, and I became half convinced that it was the work of enchantment. Ka Pule had fallen asleep, and, gazing at the lake and listening to the music in the air, I rested my head against the rough bark of a tree. As I did so I heard the distant gurgle of a brook. I could plainly hear the water splashing over the glistening stones and dying away in quiet eddies, I was more "Matter enough," growled he, pick- and more bewildered, and at length ing up, and rescuing the candle from awoke Ka Pule. I told him what I has been filling up the house with all to the lake. He explained that the seeming lake was a waillula, or mirage; that the sound of gurgling waters came from an underground stream and that the music was caused by the stirring of the flinty sands by the wind. Anyway, the whole experience was beautiful, and I have often said that I once made a visit to fairy land.— Stockton Mail.

I recite to-day the deeds of our naval heroes who have not yet received appropriate recognition.

Behold also the ships. As we will never know what our realize what it cost, I recall the unrecited fact that the men of the navy ran especial risks. They had not only the human weaponry to contend with. but the tides, the fog, the storm. Not like other ships could they run into harbor at the approach of an equinox, or a cyclone, or a hurricane, because the harbors were hostile. A miscalculation of a tide might leave them on a bar, and a fog might overthrow all the plans of wisest commodore and admiral, and accident might leave them, not on the land ready for an ambulance, but at the bottom of the sea, as when the torpedo blew up the Tecumseh, in Mobile Bay, and nearly all on They were at the board perished. mercy of the Atlantic and Pacific Oceans, which have no mercy. Such tempests as wrecked the Spanish Armada might any day swoop upon the squadron. No hiding behind the earthworks. No digging in of cavalry spurs at the sound of retreat. Mightier than all the fortresses on all the coasts, is the ocean when it bombards a flotilla. In the cemeteries for Federal and Contederate dead are the bodies of most of those who fell on the land. But where those are who went down in the war vessels will not be known until the sea gives up its dead. The Jack tars knew that while loving arms might carry the men who fell on the land and bury them with solemn liturgy and the honors of war, for the bodies of those who dropped from the ratlines into the sea, or went down with all on board under the stroke of a gunboat, there remained the shark and the whale and the endless tossing of the sea which can not rest. How will you find their graves for this Grandest fleet the world ever saw. national decoration? Nothing but the Sail on before all ages! Run up all archangel's trumpet shall reach their lowly bed. of man is poor, and all that talk about the country never forgetting those who fought for it is an untruth. It does forget. Witness how the veterans sometimes had to turn the handorgans on the street to get their families a living. Witness how ruthlessly some of them have been turned out of offices that some bloat of a politician might take their place. Witness the fact that there is not a man or woman now under 30 years of age who has any full appreciation of the four years' martyrdom of 1861 to 1865 inclusive. But while men may forget, God never forgets. He remembers the swinging hammock. He remembers the forecastle. He remembers the frozen ropes of that January tempest. He remembers the amputation without sufficient ether. He remembers the horrors of that deafening night when forts from both sides belched on you their fury and the heavens glowed with the ascending and descending missiles of death, and your ship quaked under the recoil of the 100pounder, while all the gunners, according to command, stood on tiptoe commanders, captains, pilots, gunners, with mouth wide open lest the conboatswains, sail-makers, surgeons, cussion shatter hearing or brain. A genuine coat of arms, therefore, implies descent from some old time barbarian. By negative evidence, the families without crests descend from the herd of retainers, or from the masses of workers, It is a curious survival of the barbaric instinct that causes men to prefer (where they have the choice, as in America) a descent from some feudal tyrant and murderer, as all those fellows were, rather than an ascent from an honest swineherd or serf. If in these days it is nobler to suffer wrong than to be an evil doer, surely it must be more honorable to have had as an ancestor a wronged and suffering retainer or serf than a trembling dependents his horrible droit de seigneur and the like .- Cosmopol-

GREAT PREPARATIONS AT ST. LOUIS

> St. Louis is making great preparations for the National Reunion of the G. A. R. April 13 was the day set for raising the \$100,000 required. Committees ware appointed, and under the supervision of Colonel J. G. Butler and C. H. Sampson, the work was thoroughly systematized. The city was divided into 114 districts and 1,000 canvassers were put to work. Every trade, profession and business, alphabetically arranged from A to Z was canvassed, and in twelve hours \$78,000 was subscribed. The balance of \$22,000 has since been subscribed. San Francisco had \$85,000, a large portion of the amount being an appropriation from the State. In Misiouri an appropriation for the G. A. R. would not be thought of. The Southern Historical Society, composed mainly of ex-Confederates, subscribed \$50 unsolicited. Then two gentlemen followed, each with a check for \$500, with a promise of more if needed. The seven GrandArmy posts responded liberally. Frank P. Blair Post donated \$5,000, General Ransom Post chipped in another \$5,000, Hassinduebil was ready with \$4,000, the Harding and Lyon Posts furnished \$1,000 each, General Logan and Garasche Posts joined with \$500 each, making a total of \$17,000 as the subscription of the Grand Army alone. The brewers gave \$7,800, the wholesale whisky men \$400. The saloons gave only \$1,640.50; hotels only \$1,625. The real estate agents, though receiving no direct benefit, swelled the sum total with \$1,700. It is estimated that the brewers will have on hand 1,000,000 barrels

Gen. Boulanger has just been holding a cavalry review of a novel kind. A score of corporals from the Joinville Training School went through their evolutions before him a day or two ago, mounted on magnificent-velocipedes. The composition of the little troop resembled that of the regular mounted force of the country-the bicyclists representing the light, the tricyclists the heavy cavalry. The minister has decided to have a certain proportion of the men in the infantry regiments trained to the use of the velocipede, the utility of these machines for the transmission of orders and the interchange of communications between the different divisions of the army having been satisfactorily established in practice. Their employment will, for one thing, leave all the horses of the force available for the work in which their services are indispensable. The bicycle has been found to give better results on the whole than the tricycle. and it is probable that some form of the two-wheeled machine will be definitely adopted for general use .-- The Argonaut.

General Observations.

An Ann Arbor man, D. B. Brown, first sheriff of Washtenaw county, said. to be eighty years of age, was swindled out of \$2,700 Saturday last by a silly bogus lottery game. The old man believed he was going to get \$2,700 without returning any equivalent whatever, but he didn't; and we are not disposed to shed many tears for a man who having lived a decade beyond the presumed limits of life, is yet so toolish as to be made the victim of schemers through his capidity and covetousness, unless, as is possible, the aged ex-sheriff has reached the declining point in life, when discretion and judgment take their departure.

Some of the members of the City Council tell a good joke on two or three of their colleagues, an incident of their visit to Bay City last week. It was the senior member from the fourth ward, we believe, who found a strange look . ing book in his room, and being of an investigating turn of mind, he proceeded to examine its contents. He found. several references to light in the first chapter and as he was on an electric light investigating visit, supposed it had been left for his inspection by some electric agent. He submitted it to the Mayor and City Clerk, and they partially agreed with him as to the nature and purpose of the volume, though after examining it closely, the Mayor observed that it did not confine itself sufficiently to the subject to be of any practical value to the aldermen. The book was about to be replaced where it was found, when Marshal Cremer joined the group who were discussing it, and he at once recognized the mysterious volume as a revised edition of the Bible. The subject was immediately dropped, and so was the

We have been giving some attention to the standard society game, lawn tennis, lately, and must reluctantly con fess that we are not infatuated with it. It fails to arouse the interesting animosity and rivalry usually developed in croquet, and it develops none of the excitement and partisanship incidental to cricket and base ball. Tennis players rarely become so interested in the game as to desist from discussing current topics, the coming concert, latest popular story, or some similar theme, between plays, and when the game is ended, they speak to each other as though such a thing as victory or debedy would think of climing a tree or any monting the roof of a barn to watch | credit to the inter-state commerce bill, me nting the roof of a barn to watch a game of lawn tennis. If players; the latter don't slide in the the circus doesn't come to Ypsilanti, dirt on their bosoms, in a desperate however, Ypsilanti must go to the cireffort to make the winning score; tennis cus, and the presence of the great scores are not sent by telegraph—in short the game is too tame for the 10, affords the time, place and opportimes, and it must expect to be classed tunity for the gratification of this with archery, authors, and similar harmless games and pastimes.

England is sitting up nights these days (no fun intended) getting ready for a monster celebration of the fiftieth anniversary of the date on which Victoria Alexandrina Guelph (with a dozen other hyphenated names, perhaps) accepted the position of Queen of Britain's big dominion at a salary of about \$166,337.50 per month, with house rent and fuel furnished. Her salary as queen commenced on the 21st day of June, 1837, since which time her principal occupation has been to spend it. and to petition to Parliament for more for her children and grandchildren. Had Victoria been born with all the talents and gifts she has ever given evidence of possessing, but devoid of connection with so-called royalty, her name would probably never have been heard outside the limits of the hamlet or village of her home. The virtues for which she has most been lauded are negative ones-praised for not doing the many bad things she might have done, loved for the enemies she has not made. Victoria has had as little to do new block. with the practical government of England during the past twenty years as had her cook or coachman, but that she has refrained from doing, when she might have been a source of constant annoyance and trouble to the real rulers of England, is much to her

Memorial Day, a day suggestive of sacred thoughts and sad memories, a day when the gratitude and affection of a nation for its heroes-the many thousands who gave their lives in defense of their homes and the land they loved, and for its defenders who have not yet joined the grand army on the standard of the control of the the other shore-finds expression in words and songs of eulogy and praise and deeds expressive of kindly remembrance and love, praise and prayer for the living, tears and flowers for the the living, tears and flowers for the dead, the day, we repeat, especially set School this year will consist of six apart for such dear and hallowed services was not everywhere observed in the spirit of its dedication. The events of the day to which the daily newspands of the day to which the day of the day to which the daily newspapers gave most attention were the reports of base ball games in the eastern cities and the editorial and reportorial at Wyandotte where he had lived for the scheme of the freeze of the freez comments thereon. The principal forty years. event of the day in Detroit was a murder, one most foul and cruel, though its perpetrator was a brave honest officer SEYMOUR.

one of the saloons of the city, (one of Kent and two or three other prominent gentlemen recently demanded should be permitted to legally exist). an officer was summoned, and while struggling with Wm. Dolan, at-

tempting to arrest him, the officer's revolver was discharged and the young victim of the saloon dropped dead. Wm. Dolan's mother is hysterical and wild with grief, his grandmother died from the shock caused by the news of the murder of her favorite grandchild, and the unfortunate officer is stricken with sorrow over the sad tragedy that was brought about through no fault of his. Only the saloon keeper, whose profits were increased by the drunkenness and debauchery that directly caused the crime, only he, of all the parties concerned in Detroit's bloody celebration of Memoria! Day, is satisfied and devoid of sorrow. The blood was swept from the door sill of his 'place," the evidences of the dark tragedy carefully removed and hidden, and "business" was resumed early Tuesday morning, as usual.

A Dog Show.

Detroit didn't like dogs well enough to give the "bench show" a very liberal patronage. We rather like Detroit. It wasn't in Detroit, though, that this happened: Dangle goes by with his new sporting dog. Miss A-Splendid brutes, aren't they? Miss B-Which? Miss A-Both. It wasn't in Detroit, either, but in Ypsilanti, that a languid lady leaned back in her carriage spasmodically hugging a frowsy dog the size of a watermelon, most touching love and contentment beaming from her eyes. It wasn't in either of these places that a couple alighted from the cars, the other day, and stood upon the platform while the train disappeared around a curve. She holding a poodle on one arm and a terrier on the other, with a pariot cage suspended from her wrist, said, I think everything is here -but no; where's the baby? He, with arms full of gun cases, fishing rods, etc., and surrounded by valises and hat boxes-Why, I gave the baby to you! She-Yes, and I handed it back to you. He—That's so, by gum; and I've left it

"That excels any work I have ever seen from the galleries of Detroit or Ann Arbor," was the remark of a gentleman, one day last week, referring to a handsome and life size photograph of an intimate acquaintance that had been produced by Waterman, the Congress street photographer. One of the happiest events in the class life of '87 was the reception given by Prof. Sill to the class, at his residence on Forest avenue, Thursday evening last. Prof. Sill has recently enlarged his house and beautified the property in various respects, making it one of the most desirable residences or the avenue. The social features of the evening were enlivened by singing by Professors Sill and D'Ooge, and Prof. and Mrs. Pease. Joe Sill, jr., gave a recitation. All went away feeling that they had passed the pleasantest evening

of their Normal life.

The annual visit to the Detroit schools was made last week, about 50 students, under direction of Prof. Putnam, visiting the High School and a Catholic Kindergarten. These visits are very valuable after 40 weeks of

The Citizens' Association.

The Directors of the Citizens' Association met in the Hawkins House parlors last Friday evening and laid out their work. The following officers were elected: R. W. Hemphill, vicepresident; W. L. Pack, treasurer; and Chas. W. McCorkle, secretary. A number of committees were appointed on the various branches of work, such as advertisement, soliciting members, etc. They will hold their next meeting tomorrow evening at 8 o'clock, at the office of Allen & McCorkle. Nothing is so conducive to success as sound organization and a little enthusiasm. Some of our public spirited citizens have for some time wanted an association which would give an opportunity to develop public industries, bring new manufacturies and business enterprises into the city, arouse public interest in the development of all of our resources, and bring new dwellers among us. To accomplish this the Citizens' Association of Ypsilanti' has been organized and incorporated zation perfected, an able body of directors were elected, representing as nearly as possible the various industries of the town, and we are now prepared for work. There is not one in the city who will not be benefitted by the operations of this association, so it behooves every one to assume a connection with it, and take an active interest in its efforts. The general outline of the work as planned by the Board of Directors is to appoint various committees. having in charge different branches of the work, and urge its progress as far as possible; to advertise the manifold advantages of Ypsilanti as a location for manufactories, as a place of residence and as an educational center; to look far into the future, seize every possible vantage point that can be used for the advancement of the material prospects of the city, and thus bring an influx of capital and business. Many eastern factories are looking west for new locations, this as sociation means to be on the watch and offer inducements to them to settle We are satisfied that our handsome city, located in a beautiful river valley in the midst of a superb, rich farming country, with such sanitary, educational and manufacturing resources, cannot fail to prove an attraction to those living elsewhere, and some patriotic enthusiasm on the part
